

FS-150 FRESH SERIES

AireGard
Life. Refreshed.

FEATURES

- INSPECTION DOOR
- ACTIVATED CARBON FILTER
- METAL FILTER
- HIGH EFFICIENCY COMBO FILTER

FRESH AIR SUPPLY VENTILATOR

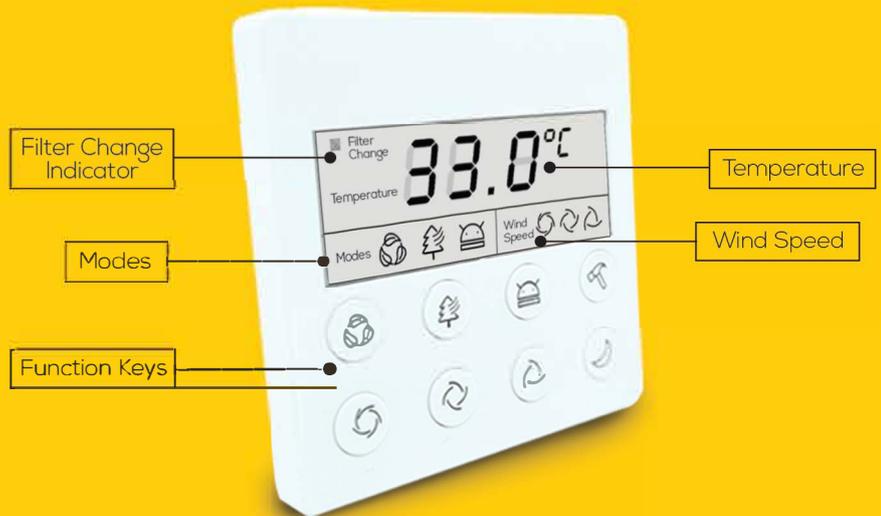

Fresh Series FS-150 is a breakthrough in air ventilation system and technology. It is able to intelligently monitor outdoor air quality and control the amount of air flow inward.

Air is then purified through a quadruple composite filtration system to ensure clean and oxygenated fresh air. Performing all these in a energy saving, low noise and compact designed structure.

It also allows you to take over control with it's unique and convenient control system that provides various modes such as **"plus"**, **"direct"**, **"smart"**, **"bypass"** and **"sleep"** based on your preferences.

Your lungs will thank you for it.

The Remote Control Interface

Air Flow	Installation	Power	Duct Size
150 CFM	Ceiling	68 W	6 inch

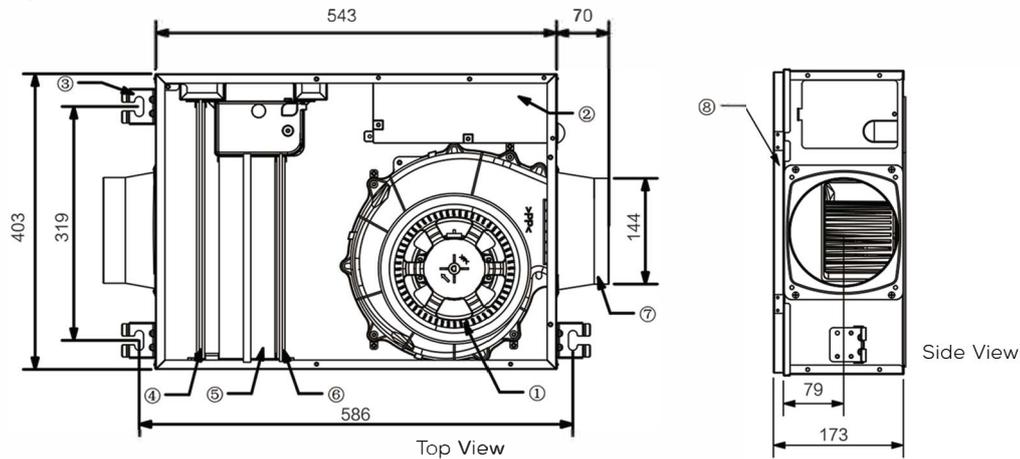

Product Specification

MODEL	RATED VOLTAGE [V]	RATED FREQUENCY [Hz]	OPERATION MODES					WATER PROOF LEVEL	WEIGHT [kg]
			SPEED	POWER [W]	AIRFLOW [m ³ /h]	AIRFLOW [CFM]	NOISE LEVEL [dB]		
FS-150	240	50	HIGH	68	250	150	41	IPX2	9.5
			MID	54	170	100	33		
			LOW	50	135	80	28		

NOTE:

- The unit of Air Flow, Voltage and other variances are measure under the condition of zero Static Pressure
- The measurement of Air Flow are obtained under the strictest monitoring within our reasearch facility. The readings may varies within a difference range of ± 10 %

Dimension & Spare Parts

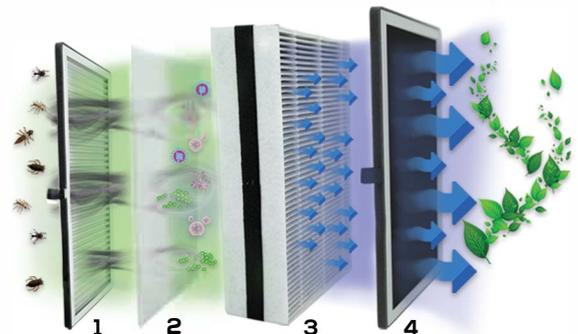

*All measurement in mm

No.	1	2	3	4	5	6	7	8

QUANTITY	1	1	3	1	1	1	1	1

Fresh Air Ventilation System

- 1** > **Metal Filter**
Remove large particles, small insects and pollens
- 2** > **Pre Filter (G3 Grade, Efficiency up to 90%)**
Filters particles such as mold and spores (up to PM 3 micron)
- 3** > **HEPA Filter (H11 Grade, Efficiency up to 95%)**
Filters particles such as virus (unattached), carbon dust and radon (up to PM 0.3 micron)
- 4** > **Carbon Activated Filter**
To absorb formaldehyde, benzene, ammonia, radon and harmful chemicals
